PROFILE

Telematics engineer excited to use my creativity and leadership in mobile and web development projects as well as infrastructure and DevOps projects. I have led and participated in academic teams integrating IoT infrastructure and services. Currently I focus on high-quality, maintainable and scalable Android development.

EMPLOYMENT HISTORY

Trainee Android Developer at Globant, Cali
July 2023 — January 2024

I had the opportunity to receive training from many expert Android developers while creating a mobile application that integrated emerging technologies and development best practices such as: SOLID principles, clean code, and clean architecture. At the same time, I strengthened my soft skills such as: effective communication, teamwork and leadership.

Full Stack Developer at Insight 4.0, Cali
October 2022 — July 2023

I developed a couple of applications for social improvements. This experience strengthened my assertive communication and adaptability skills, in addition to learning techniques such as development with React and React Native.

Math Monitor at Universidad ICESI, Cali
January 2020 — September 2022

I supported more than 1000 students in the preparation, resolution and understanding of different works and studies in the areas of Linear Algebra, Calculus, Statistics and Physics.

EDUCATION

Telecommunications Engineering (ABET), Universidad Icesi, Cali
January 2019 — February 2024

I had an honor roll recognition with a scholarship in 2019, I participated in events as an exhibitor at ICESI Interactiva in 2022. I represented the university in the chess discipline at the departmental and national level, and I was champion at the local university level.

Commercial Technical Bachelor's Degree, I.E. Tulio Enrique Tascón, Buga
January 2012 — December 2018
